 - II. Claims 6-11, 19-25, and 28-46, drawn to a method for generating solvent solution from one or more suppliers and market research and user trend data of users requesting said solvent information, classified in class 705, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as processing project input information and generating project solution information. See MPEP § 806.05(d).
